DUBROVNIK

Dubrovnik is a Croatian city on the Adriatic Sea coast in the extreme south of Dalmatia, positioned at the terminal end of the Isthmus of Dubrovnik. It is one of the most prominent tourist destinations on the Adriatic, a seaport and the center of Dubrovnik-Neretva county.

Dubrovnik, the centre of the southernmost region of Dalmatia and its most famous representative, is also the star on the front pages of many prestigious world magazines, as well as being at the very top of

the scale of the most beautiful cities of the world. Year on year it is proving itself as a source of inspiration for artists, a venue favored by members of royal families and the jet setters of the world. It belongs to them, but no more than it belongs to all those who came but once. It is quite simple really; one encounter is enough for those fine threads between you and this glorious city to be spun to last...

"Those who seek paradise on Earth must come to Dubrovnik", wrote George Bernard Shaw.

Over a thousand year old history of Dubrovnik is visible in every part of this city. The city is a living museum and a live stage, and has an ideal connection between its historical past and the modern day. The southernmost city in Croatia, Dubrovnik was one of the centers of the development of language and literature and was home to many famous poets, playwrights, painters, mathematicians and other scholars. Its gorgeous old town became a UNESCO World Heritage site in 1979, and its charm has attracted tourists who want a taste of the Mediterranean without the crowds. Dubrovnik is a city that charms, a city that you fall in love with and always return to like new, to discover more unique experiences.

lan D. Watson President

European Federation of Clinical Chemistry and Laboratory Medicine (EFLM)

Dear colleague,

It is indeed a pleasure to welcome you to the second of the Joint Congresses organised by the European Federation of Laboratory Medicine and Clinical Chemistry (EFLM) and Union of European Medical Specialists Laboratory Medicine section (UEMS) in the delightful setting of Dubrovnik. It is a particular pleasure for EFLM to recognise the effort put in by the Scientific and Organising committees in creating the second Congress which builds on the very successful Congress hosted by our Portuguese colleagues in October 2010 in Lisbon.

The co-operation between the Laboratory Medicine section of UEMS and EFLM is important on many levels, not only for the provision of a quality congress that addresses European facets of laboratory medicine and practice, but also the opportunity it gives us to discuss and consider issues that affect all of us in laboratory medicine and try and develop harmony and understanding within our profession in Europe. We, as organisations, will have the opportunity to debate issues of relevance to both our memberships for the benefit of improving the recognition of educational requirements and achievements.

Our particular thanks go to Gerhard Zlabinger who has organised the Scientific programme and provided us with an excellent array of topical subjects for our consideration and to Ana-Maria Simundic who, as Chair of the organising committee, has taken on the task of organising the meeting along with her colleagues who we also thank and I am sure, given her organisational skills, we will have a very enjoyable and pleasant meeting.

I do hope that you will enjoy the meeting, that you will have the opportunity to meet old friends, make new ones and re-inforce the developing relationship between our two organisations to our mutual benefit, but also have the opportunity to visit the delightful city of Dubrovnik and to enjoy some of the pleasures which this world heritage city offers.

Ian D. Watson President

Lena Norlund President

European Union of Medical Specialists, Board of Medical Biopathology (UEMS LM-SMB)

Dear Colleagues,

On behalf of the UEMS, I would like to welcome you to the 2nd European Joint Congress of EFCC and UEMS in collaboration with the Croatian Society of Medical Biochemistry and Laboratory Medicine.

Promoting laboratory medicine is an everlasting and dynamic topic that is driven by the change of disease spectrum, social development, and technical progress. Today, moreover, we cannot forget the economic situation that limits our planed actions. The combined progress of both medical laboratory medicine and biomedical engineering provides a powerful combination to translational medicine, at the clinical interface, based on trans-disciplinary and inter-disciplinary collaboration in addition to information sharing. The 2nd European Congress will hopefully function as a platform for these activities.

Connect with the European Laboratory Medicine Community

Attend the whole Congress and accomplish the following main goals:

- Meet colleagues, peers and experts from around the world, and continue to build
 on your professional connections. Although we have moved into a digital age
 dominated by e-mails, twitter and fewer personal communications, such as our
 old fashioned eye to eye contact, we still need that kind of communication since
 more than 85% of your language is done by body language to show the finer
 shade of our meanings and understanding.
- See new science and technology in laboratory medicine diagnostics, automation, information systems, point-of-care, biotechnology and more from all the exhibitors on the show floor. Furthermore, it is an ideal opportunity to meet with all laboratory medicine related trade exhibitors. To organize a successful and extremely well attended congress, like our last, this is only achievable by the active participation and generous support that we have always received from our loyal sponsors, exhibitors and delegates.

Keep up—to-date on the latest trends and advances happening in laboratory
medicine at the clinical interface and learn what we know about the future. With
so many educational opportunities in lectures, plenary sessions, symposia, pro
and con sessions, and not to forget coffee talks, you can design an educational
experience that best meets your own professional needs.

This congress has a broad spectrum of scientific lectures covering the clinical interface's all angles. What I want to draw attention to is the Poster sessions. Do not forget to attend and learn about our fields most brand new ideas to meet our younger colleagues who are slowly taking over from us. Make a new friend. Beyond classic plenary lectures and symposia, educational sessions are supplemented by interactive pro-con sessions. This is the second thing you cannot miss: make your voice heard!

The congress also has a special Croatian cultural touch. At the opening ceremony, beside all speeches, the Croatian Music Society St. Cecilia will perform a traditional knightly sword dance, and we will be entertained by a Croatian a capella ensemble, Ragusa. The get-to-gether party will be held within the Monastery of St. Clarissa at the entrance to the Old Town and the Croatian singer Goran Karan will entertain us.

With your head full of new information and new ideas, would it not be a good idea to stroll around the beautiful city of Dubrovnik to let it all sink in. In this relaxed state you might find new inspiration for future projects, who knows?

We look forward to welcoming you at our meeting and I hope to have the pleasure to meet with you in person.

Lena Norlund Madam President

DUBROVNIK CITY WALLS

Dubrovnik's unique appearance, famous the world over, has much to do with the old city walls. These are 1940 metres in length and encompass the entire Old Town. They comprise a series of fortifications, bastions and towers.

The walls were built in the period from the 13th to the 17th century in order to defend Dubrovnik from its enemies. The main landfacing wall is between 4 and 6 metres in width, while the sea-facing wall is a little narrower, between 1.5 and 3 metres. Its

height is as great as 25 metres in some places and at key points there are fortifications. It holds many beautiful forts and fortresses, most famous being Minceta, Revelin, St. John, Bokar and the separated Lovrijenac.

Ana-Maria Simundic President

Croatian Society of Medical Biochemistry and Laboratory Medicine (CSMBLM)

Dear participants and guests,

On behalf of the Croatian Society of Medical Biochemistry and Laboratory Medicine and its members, I would like to warmly welcome you to the 2nd EFLM-UEMS European Joint Congress - Laboratory Medicine at the Clinical Interface which takes place together with the 7th Croatian Congress of Medical Biochemistry and Laboratory Medicine, in this beautiful city of Dubrovnik.

Organizing a Congress like this one requires knowledge, tireless effort and hard work by many individuals. I take this occasion to express my deepest gratitude and appreciation to all of them for the efforts they have invested in making this Congress a success.

I wish to acknowledge the contribution of the Scientific Committee for delivering such a challenging scientific program. We hope that you will enjoy their selection of topics and presenters as well as the interactive and stimulating atmosphere of this meeting.

My special thanks go to the Organizing Committee for their wonderful work and efforts in making this conference a reality.

I hope you will enjoy your stay in Dubrovnik!

Key note speaker

Education: BBA, University of Zagreb, M.Sc. (Electrical Engineering), MBA, Columbia University, New York, PhD, University of Zagreb

Fields of expertise: Leadership & Strategic Management; Innovation Management; Information Technology & Information Systems Management; Organizational Culture and Behavior

Professional and political activities:

- University Professor (Management, IT Management)
- Director, Croatian Information Technology Institute
- Minister of Science and Technology, member of Croatian Government
- President of the Commission for Technological Cooperation within Alps-Adriatic
- Honorary member of Croatian Helsinki Committee
- Member of The Club of Rome, Croatian chapter
- President of Zagreb city assembly, elected city council member
- Management consultant to regional and international companies (Coca Cola, INA, DHL, Banca Intesa, NEXE group, LURA, Ericsson, Krka, Gorenje, Podravka, Henkel, IskraTel, FINA, Nova Ljubljanska banka etc.)

International academic activities

 Visiting professor at UCLA (University of California at Los Angeles), Visiting professor at the Renmin University in Beijing, Visiting professor at the Technical University in Budapest (MBA), Maribor University (MBA), Sarajevo University (MBA), Montenegro University (PhD Programme)

Prizes and awards

 Fulbright scholarship, Eisenhower fellowship, Strossmayer Award, Golden pen – Croatian Journalist Society and other

Other

- Author of fifty three books, more than 300 scientific and expert papers and a few hundred articles in magazines
- Published a novel (Private Investigations, Zagreb, 2002), a book of poetry (Various Games, Zagreb 1999), a collection of political essays (Form Crisis to Vision, Zagreb, 1989) and a strategic book (Croatia 2020, Zagreb 2011))
- Fluent in English, speaks French, Italian, Slovenian and Russian
- Father of three sons, Dario, Davor and Luka and daughter Lana

PL1: Preventive, predictive and personalized medicine - where are we?

Chair: Michael Neumaier (Mannheim, Germany)

Olga Golubnitschaja Bonn, Germany

Olga Golubnitschaja has studied journalism, biotechnology and medicine - all diplomas with excellent marks; later she was awarded with several fellowships for biotechnological and medical research in Paediatrics and Neurosciences (Medical Centres in Austria, Russia, UK, Germany, The Netherlands, and Switzerland). Prof. Golubnitschaia is one of the best cited scientists in the research fields of "gene hunting" and "subtractive hvbridisation" applied predictive to prenatal & postnatal diagnostics published as O. Labudova in years 1990-2000. Prof. Golubnitschaja is an expert in molecular diagnostics actively publishing in the fields of perinatal diagnostics, Down syndrome, diabetes mellitus. hyperhomocysteinemia, cardiovascular disease, neurodegenerative and TAU pathologies, cancer. Olga Golubnitschaja is the cofounder of the theory of multipathway related blood organ

fingerprinting with specific molecular patterns at epi/genomic, transcriptional and post/translational levels, author of fundamental works in integrative medicine. Prof. Golubnitschaja is an active Professor at several European Universities and in International Programmes for Personalised Medicine and author of more than 300 international peer-reviewed publications in the field: awards: National & International Humboldt-Fellow; Highest Prize in Medicine and Eiselsberg-Prize in Austria. Prof. Golubnitschaia is Secretary-General of the "European Association for Predictive. Preventive & Personalised Medicine" (EPMA in Brussels, www. epmanet.eu), Editor-in-Chief of "The EPMA-Journal" (BMC in London): Member of Editorial Board in several international iournals dedicated to medicine or/ and biotechnologies; Book Editor of "Predictive Diagnostics & Personalised Treatment: Dream or Reality", NSP, New York 2009; Book Co-editor "Personalisierte Medizin", Health Academy, Dresden 2010; Book Series Editor "Advances in Predictive, Preventive & Personalised Medicine". Springer 2012-; European Representative in the "Early Detection Research Network", EDRN at the NIH / NCI, http://edrn.nci.nih. gov/; Advisor and Evaluator of projects dedicated to personalised medicine at the EU-Commission in Brussels and NIH/ NCI, Washington D.C., USA, International Foundations and National Ministries of Health / Education / Science and Technology.

Maurizio Ferrari Milan, Italy

Maurizio Ferrari, M.D., is Full Professor of Clinical Pathology, University Vita-Salute San Raffaele, Director of Clinical Molecular Biology and Cytogenetics Laboratory (from 1997), and Head of Genomic Unit for the Diagnosis of Human Pathologies, Center for Translational Genomics and Bioinformatics, IRCCS San Raffaele, Milan, Italy (from 1988).

He received his Degree in Medicine and Surgery with full marks at the Milano University in 1974, Specialization in Pediatrics at the Milan University in 1977, Specialization in Hematology at the Milan University in 1980 and Specialization in Medical Genetics at the Catania University in 1991. He was Post-doc at Hospital Paul Brousse, Villejuif, Paris in 1975 and Honorary Registrar in Haematology at University College Hospital, London in 1979.

He served as Assistant at the Laboratory of Clinical Research, Istituti Clinici di Perfezionamento, Milan (1975-1987), then as Vice-Director of Clinical Chemistry Laboratory, Chief of Molecular Diagnosis Laboratory and Prenatal Diagnosis Service, IRCCS H. San Raffaele, Milan (1988-1997).

He was Scientific Coordinator of Clinical Research, IRCCS San Raffaele, Milan (1996-1999), and Chairman of Committee on Clinical Molecular Biology Curriculum (C-CMBC) of IFCC (2002-2007).

He is Chairman of the Education and Management Division (EMD) of IFCC (from 2012), member of IFCC Task Force on Pharmacogenetics (IFCC TF-PG, from 2008), advisor of CLSI Committee on Molecular Methods, and National partner of European Molecular Genetics Quality Network (EMQN).

He was Co-President of the International IFCC-WordLab Congress (Firenze 1999) and Chairman of the Scientific Committee of the 1st International Congress of Clinical Molecular Biology (CMB) (Firenze 1999).

He received in 2004 the IFCC-Abbott Award for significant contributions in molecular diagnostics.

His scientific interests are oriented mainly on molecular diagnostic methods, nucleic acid circulating in maternal plasma, molecular studies of several genetic pathologies as eye diseases, neurological diseases, cardiac arrhythmia diseases, iron metabolism and haematological diseases.

He developed methods for DNA analysis as multiplex PCR and capillary electrophoresis also in a temporal thermal gradient, set up a method involving the ligase chain reaction (LCR) and developed a new method known as double-gradient DGGE (DG-DGGE) for the identification of unknown mutations. In the last 4-5 years he has focused his research activity on the detection of foetal DNA in maternal plasma for non-invasive prenatal diagnosis and for diagnostic application in the genetic and oncology field. At present his research is focused on the development of diagnostic tests with the application of microelectronic chip technology and next generation sequencing.

He is author of 780 publications: 200 in peer reviewed journals, 63 in other journals, 1 book, 45 book chapters and 471 abstracts at international and national congresses.

FORTRESS LOVRIJENAC

Located at the western side of the Town outside the City Wall at a 37 meters high cliff. It dominates, both the sea and the land entrances to the Town from the west. According to old scripts it was built in only three months. Today its interior is one of the most dignified stages in Europe, a well-known place for Shakespeare's Hamlet performances. Above the entrance is a famous Latin inscription: *Non bene pro toto libertas venditur auro* ("Liberty is not well sold for all the gold").

answers for better IVF success

With AMH, fertility specialists can now accurately and reliably assess ovarian response to predict success rates and tailor drug regimes among patients, thereby enabling them to achieve better IVF success, efficiently and cost-effectively.*

Read what the experts say

Anti-Müllerian hormone is able to:

- improve birth rates by measuring ovarian reserve and facilitating individualized treatment strategies^{1,2}
- reduce the risk of OHSS** by predicting response to controlled ovarian stimulation^{1,3}
- reduce drug cost for ovarian stimulation by 30% by guiding the optimization of low responder treatment⁴
- measure independently of the day of the menstrual cycle⁵

Beckman Coulter is the exclusive provider of the AMH assay. Visit us at **www.beckmancoulter.com/AMH**

Dr. Dufour is currently a Consultant, Pathology and Hepatology, at the Veterans Affairs Medical Center, Washington DC, and Emeritus Professor of Pathology, George Washington University. After graduating from the Medical College of Wisconsin, he completed residency training in Anatomic and Clinical Pathology at the National Naval Medical Center in Bethesda, MD, He is board certified in Anatomic and Clinical Pathology as well as in Chemical Pathology. He has published over 200 peer-reviewed papers, abstracts, and book chapters, and has been lead editor on 9 books, with a major emphasis on liver disease and endocrine testing. He has been involved in training residents in Pathology as well as fellows in Gastroenterology and Endocrinology. He is Executive Editor of the patient education website Lab Tests Online (www.labtestsonline.org), and a member of several editorial boards, and currently serves as Treasurer of AACC. He has received numerous educational awards, including the 2012 College of American Pathologists Excellence in Education Award, the 1999 AACC Outstanding Contributions in Education Award, and the 2004 Edward Rhodes Stitt Lectureship of the Association of Military Surgeons of the United States.

Congress hall Mistral; Sections A, B, C

09.00-10.00	PL2: Laboratory medicine online
	Chair: Ilkka Mononen (Turku, Finland)
09.00-09.30	Health literacy on laboratory tests Robert D. Dufour Washington, DC, USA
09.30-10.00	Mobile technology and the laboratory information services Esa Soini Tampere, Finland

16.00-16.20	Pro - Laboratory accreditation - where is the real benefit for the patients? Ines Vukasović Zagreb, Hrvatska
16.20-16.40	Contra - Laboratory accreditation - where is the real benefit for the patients? Mathias M. Müller Vienna, Austria
16.40-17.00	Discussion

STRADUN

The famed Dubrovnik Stradun, or its official name Place, is the favourite walking area for all the people of Dubrovnik, especially the young, and for tourists from all over the globe. The biggest, longest and widest street in Dubrovnik, the Stradun dates back to the 13th century, while the uniform houses that line it were mostly built in the 17th century. It connects the Pile Gates (western entrance) and the Ploce Gates (eastern entrance). The street is 958 feet

(292 metres) long and is the commercial, entertainment and spiritual centre of Dubrovnik. The shiny, slippery, marble-paved Stradun is the main walkway of Dubrovnik's Stari Grad, and the best place to get a feel for the 'pulse' of Dubrovnik.

PL3: How to approach malnutrition from laboratory point of view? Chair: Ilkka Mononen (Turku. Finland)

Walter Nützenadel Mannheim, Germany

1956-1963 Medical Schools, Universities: Heidelberg, Berlin, Kiel
1963-1965 General Medical training: various Hospitals in Germany
1965-1969 Pediatric Training: Children's Hospital University of Heidelberg

ONOFRIO'S FOUNTAINS

Big Onofrio's Fountain

Located at the open space right to Pile gate. It is a 16-sided drinking fountain built by Onofrio de la Cava (1438 - 1444). The Fountain is part of the town's water supply system which Onofrio managed to create by bringing the water from the well in Rijeka Dubrovacka. The well is located 20 km from Big Onofrio's Fountain and this construction was a masterpiece of that time.

Small Onofrio's Fountain

Built by Petar Martinov in 1441 in the shape of an octagonal basin with defaced sculptural panels, from which rises a 'baroque-Gothic' column recalling the fountains of Viterbo.

Wednesday, 10 October, 2012

18.00-20.00 Opening ceremony

Opening ceremony and Welcome cocktail will be held at Hotel Rixos.

At the opening ceremony Croatian Music Society St. Cecilia will perform traditional knightly sword dance.

Croatian Music Society St. Cecilia from Korčula follows the tradition of the first Croatian singing society in Dalmatia founded in 1883. It was reorganised in 1991 and beside the traditional sword dance Moreška from Korčula it cherishes traditional Croatian a cappella and choir singing as well as folk dances from the island of Korčula. Its most festive event is on July 29 on the Day of the Town Korčula and the Celebration of Town Patron St. Theodore. The Society has yearly 50 performances in Korčula and other places in Croatia and internationally. The Society's guidelines have always been: "... to enrich hearts of local youth by learning and cherishing the Croatian folk singing, to incite their feelings towards their mother tongue and Croatian customs, to plant a firm belief into their soul that they are obliged to maintain and defend national values, to feel home in their own country and to treat any foreign person as their guest, according to old Croatian customs." (From the Rulebook of the Society from 1883).

Moreška is a knightly sword dance which originates from Mediterranean around 12th century. The name Moreška comes from Moors – Moriscos, what is also present in Spanish adjective *morisco* and in Italian one *moresco*. It is assumed that the first Moreška dance was performed Lerida, Spain in 1150 in a memory of Moors dislodgement. Similar sword dances had been spread until the end of 14th century throughout the Catholic Europe.

The first records of Moreška date from 1273 in Trogir and since 15th century this dance has been preformed every year in Korčula.

20.00-21.00

Welcome cocktail

After the Opening ceremony a Welcome cocktail will be served and our dear guests will be entertained by Croatian a cappella ensemble Ragusa.

Croatian a cappella ensemble Ragusa (Klapa Ragusa) was founded in July 1977. During thirty years of its successful work the Klapa Ragusa has accomplished to impose its talent to the Croatian music production as a special ensemble for a cappella singing.

Building their style on a synthesis of Dalmatian tradition and Dubrovnik singing with elements of modern interpretation, Klapa Ragusa has become recognisable as well outside its home town. Beside the enthusiasm and talent of ensemble members the fact that they had decided for songs of modern music authors, among which the most important is maestro Đelo Jusić, has assuredly contributed to its recognisable sound. Exactly in his songs this klapa shows its optimal performing abilities. Klapa Ragusa has performed on a variety of significant events in Croatia and internationally, participated in receptions for national and foreign politicians, in promotions of prominent national cultural institutions and was engaged in tourism promotion.

Klapa Ragusa performed successfully in Germany, France, Austria, the Netherlands, Belgium, Bulgaria, Slovenia, Italy, USA, Sweden, Norway, Slovak Republic, Hungary, Czech Republic, Malta and Montenegro.

Opening Ceremony and Welcome Cocktail are free for all registered participants.

ORLANDO'S COLUMN

Orlando's Column is situated in front of the baroque St. Blaise (Sv. Vlaho) church. It was built by Bonino di Milano in 1419. The medieval gothic quadric-angular engraved stone statue of the young knight Roland in armour with a shield and a raised sword in his right hand symbolises the independence of Dubrovnik. Form the top of the column a flag of the Republic with the image of St. Blaise, the patron saint, used to stand proudly. The length of the knight's elbow used to present the Dubrovnik length measuring unit, the so-called 'lakat' ('elbow') – 51.2 centimetres.

Thursday, 11 October, 2012

20.00-23.00 Get-together party

Get-together party will be held at Restaurant Klarisa located within the Monastery of St. Clarissa at the entrance to the Old Town *via* Pile city gate. During the Get-together party guests will be entertained by a famous Croatian singer **Goran Karan**.

Monastery of St. Clarissa in Dubrovnik is situated southern of the Pila Gate beside the Dubrovnik City Walls on Poljana Paska Miličevića. It is the most famous of eight women's monasteries in Dubrovnik.

The monastery was built at the end of 13th and the beginning of the 14th century. Due to its reputation it was one of the most important women's monasteries in the Republic of Ragusa. In 1432 an orphanage for abandoned children was opened in one part of the monastery. Children would be taken care of until they were 6 after which they would be adopted by well-situated families. The orphanage in the Monastery of St. Clarissa was one of the first institutions of that kind in the world. In 1667 the monastery was significantly damaged due the earthquake of catastrophic proportions. It was renovated by the municipal government.

After Napoleon's conquest of Dubrovnik French government turned the monastery into horse stable and ammunition storage. After the World War II the monastery was adapted to a restaurant and an open air cinema. Today its purpose is multiple. In its cloister there is a restaurant while in the rest of the monastery the Roman Catholic Diocese of Dubrovnik has its premises.

Restaurant Klarisa is certainly one of the most beautiful locations in the historical centre of Dubrovnik. Restaurant Klarisa, previously known as Restaurant Jadran, opened in 2011 after complete reconstruction. The restaurant offers healthy and tasty Mediterranean food accompanied by the wine card with a wide selection of indigenous brands of superior Croatian and foreign wines.

Goran Karan, Croatian singer, was born in April 1964. In the 1980's he has started his career as a musician in various bands: "Epicentar, Deveti krug, Zippo and Big Blue.

In 1995 as a vocal leader of Big Blue he received the award for the best rock song of the year for the song *Priznaj mi*. In the same year he accepted the lead role in a musical *Sarajevski krug*. The album *Sarajevski krug*, the Big Blue's first album, was released in Croatian and English version and the group toured successfully in Austria, Germany, Italy, France and USA (three concerts).

At the beginning of 1997 Goran started his solo career and in 1998 he won at Music festival in Zadar (Zadarfest) with the song *Kazna mi je što te ljubim*. At the end of 1998 he starred in Vienna in the lead male role in musical *Rock It* in the theatre *Ronacher* in a production compiled of eight the most popular musicals from the 1960's until now like Jesus Christ Superstar, Grease, Hair, Tommy and other.

So far Goran has performed on a variety of significant concerts. With the show *Sarajevski krug* he performed eight times in the *Concert Hall Vatroslav Lisinski* in Zagreb, twice in *Posthof* in Linz and in *Theater an der Wien* in Vienna.

Goran has participated in the *World Culture Festival* taking place on 2-3 March 2011 on the *Olympiastadion* in Berlin having his song *All the Colours of the Rainbow* elected for the theme song and the central event of the Festival. A great number of musicians participated in the recording of the song which was recorded in 16 studios on 3 continents with participation over 500 musicians.

The price for the Get-together party is 25 EUR. Tickets include dinner (standing buffet) and concert.

Tickets are available at on-line Congress registration or on-site at Congress registration desk.

Posters will be displayed in two time periods:

- Thursday, October 11, 2012 (these posters can be mounted from Thursday, October 11, 2012, from 8.00 hours and removed by Thursday, October 11, 2012, by 18.00 hours)
- Friday, October 12, 2012 (these posters can be mounted from Friday, October 12, 2012, from 8.00 hours and removed by Friday, October 12, 2012, by 18.00 hours)

Posters will be displayed on specified boards. Each board will carry a poster number. Board size is 1 m (width) x 2 m (height). Preferable poster size is 70 x 100 cm.

During the Thursday, 11 October and Friday, 12 October, in a period of 12.15-14.00 hours a Poster Walk will be organized in the poster area. One poster author should be present at the poster site and will have 5 minutes to present the work to the Poster Committee.

Poster Committee will award 10 poster prizes. If author is not present at the poster site, respective poster will not be considered for the poster prize. First prize (1000 EUR), and 9 Second prizes (500 EUR each). Awards will be given at the Closing ceremony, on Saturday, 12 October, 2012.

Schedule of poster displays is presented in the table:

Poster topic	Day	Poster area
P01 – Accreditation and laboratory management	Friday, October 12, 2012	
P02 – Cardiovascular diseases	Thursday, October 11, 2012	
P03 – Clinical chemistry 1	Thursday, October 11, 2012

P02 – C	ardiovascular diseases	
P02-01	CETP, LDL particle size and intima media thickness in patients with coronary heart disease	Tosheska-Trajkovska K, Labudovic D, Jovanova S, Jaglikovski B, Alabakovska S

D02 02	NIT and DND in costly and and in decoding to	Comment A. Landiyalı Malaya
P02-02	NT-proBNP in anthracycline-induced cardiotoxicity in children	Grzunov A, Leniček-Krleža J, Obuljen J, Žižić V, Stepan- Giljević J, Kapitanović S
P02-03	Cardiac biomarkers for monitoring patients with percutaneous coronary intervention	Skitek M, Kranjec I, Jerin A
P02-04	Unexpectedly elevated cardiac Troponin I level in the patient without acute coronary syndrome: a case report	Hrabric Vlah S, Sokolić J, Medved I, Dvornik Š
P02-05	Levels of oxidized low density lipoproteins (oxLDL) and IgG autoantibodies against oxLDL in the sera	Balatskaya N, Budzinskaya M, Goldina N, Michajlova M, Parsunkova K
P02-06	The association of inflammatory mediators and transient ischemic attack	Dukić L, Šimundić AM, Martinić Popović I, Lovrenčić-Huzjan A, Šerić V
P02-07	Role of hemostatic and other markers in patients with coronary artery disease	Bozovic D, Dragnic S, Nikolic V
P02-08	Serum uric acid levels and its association with coronary artery disease: an Indian Cohort Study	Das S, Gupta SK, Girish MP, Ray PC
P02-09	Matrix metalloproteases and their inhibitors in the treatment by omega-3 polyunsaturated fatty acids	Gaikovaya L, Kukharchik G, Krapivka N, Nesterova N, Khushvaktova N, Vavilova T
P02-10	Oxidative stress in hypertension induced congestive heart failure patients in Nigeria	Akinosun O, Sule Z
P02-11	New way of endothelial dysfunction research: flow cytometry testing of circulating endothelial cells	Sirotkina O, Feoktistova V, Topuzova M, Khushvaktova Z, Lipunova A, Vavilova T
P02-12	Correlation between two methods for determination of cardiac troponin I	Ille K, Spasić Obradović G, Mitrović J, Milatović Jezdić V
P02-13	Biomarkers of inflammation and angiographic score in patients with peripheral arterial disease	Perkov S, Flegar-Meštrić Z, Vidjak V, Novačić K, Slavica M, Kavur L
P02-14	Differences in phenotyping heart failure patients- hsTroponin I versus hsTroponin T	Farinha R, Martins S, Silva N, Frioes F, Bettencourt P, Guimaraes J
P02-15	Serum superoxide dismutase activity: A potential biomarker of atherogenesis	Mujagic R, Crnokrak S, Županić D
P02-16	Serum neuron-specific enolase and procalcitonin as predictors of survival in comatose cardiac-arrest	Illana F, Castillo C, Fuentes M, Ortega M, Arroyo M
P03 – C	Clinical chemistry 1	
P03-01	The importance of the clinical state for successful collection of sweat sample in children	Matica J, Aralica M
P03-02	Relationship between gamma-glutamyltransferase levels with alcohol consumption in a young population	Abreu R, Leitão M, Almeida A, Bellém F, Cardoso V, Pinto A
P03-03	Prealbumin: nutritional marker in intensive care patients?	Cachapuz I, Lobo L, Noronha M, Lopes E, Amaro A, Granja C, Alves V

P03-04	Plasma homocysteine and cerebrospinal fluid biomarkers in patients with Alzheimer's disease	Petek Tarnik I, Katušić Hećmović S, Malnar M, Trkanjec Z, Bukovec Megla Ž
P03-05	One-step whole blood fluorometric emission scan method for diagnosis of cutaneous porphyrias	Kurt I, Ozturk O, Sertoglu E, Tapan S, El-Fawaer S, Bilgi C
P03-06	Impact of inflammation on high density lipoprotein function in polycystic ovary patient	Gidwani S, Phelan N, McGowan A, Gibney J, Young I, McEneny J
P03-07	Optimum cut-off value of salivary melatonin to discriminate between ADHD children and a control group	Gorriz-Pintado S, Pitarch- Castellano I, Orts-Costa JA, Puertas-Cuesta FJ
P03-08	Dim Light Melatonin Onset assessed with only two timed salivary samples	Orts-Costa J, Pitarch-Castellano I, Tárrega-Roig E, Puertas- Cuesta F
P03-09	Thrombocyte serotonin and serum cholesterol concentration in depressed patients	Ruljancic N, Mihanovic M, Cepelak I
P03-10	Effect of melatonin administration on lipid peroxide and antioxidant levels in tissues of SHR	Kitagawa A, Ohta Y
P03-11	Adipocyte fatty acid binding protein and cardiovascular risk in women with overweight/obesity	Sypniewska G, Mankowska-Cyl A, Bergmann K, Rajewski P
P03-12	Determining the concentration of the hormone leptin and ghrelin in the treatment of obese people	Posavec L, Krpan R, Nikolić M, Mirošević G, Bukovec Megla Ž, Stančić V
P03-13	Elevation of urinary porphyrins after prolonged sedation with Propofol. Fact or interference?	Castillo Perez C, Illana Camara F, Torrejon M, Velasco G, Ferrero J, Arroyo M
P03-14	Glutathione peroxidase and reduced glutathione levels depend on aging	Cinar E, Bilgin R, Yalcin S
P03-15	Acute intermittent porphyria induced by valproate: a clinical case.	Garcia Moreira V, Fernandez Leivas A, Garcia Alonso S, Martinez Gago M, Laborda Gonzalez B, Fernandez Rodriguez E
P04 – C	linical chemistry 2	
P04-01	Evaluation of new point of care blood gas system Rapidpoint 500	Baršić I, Brkljacic V, Rogic D, Sertic J
P04-02	Evaluation of the Enterprise Point of Care meter (EPOC) for the emergency ward	Buurman S, Heringhaus C, Schenk P, Cobbaert C
P04-03	Performance of Nova StatStrip point of care blood glucose meter in a neonatal intensive care unit	Tendle K
P04-04	A large-scale randomized clinical trial on the effectiveness of reflective testing in primary care	Verboeket-van de Venne W, Kleinveld H, Oosterhuis W
P04-05	Microdialysis-based biosensors in experimental and clinical research	Cibicek N, Vacek J, Hrbac J, Zivn H, Mandak J, Ulrichova J
P04-06	Pitfalls in measurement of lysosomal enzymes using dried blood spots on filter paper	Brzak M, Bilić K, Fumić K

P04-07	Clinical evaluation and etiologies of prolonged jaundice in IVF born neonates	Mehrotra V, Saini P
P04-08	Influence of the assay for measuring serum albumin on level of corrected calcium (CaC) concentration	Garcia Moreira V, Martinez Gago M, Fernandez Leivas A, Bachiller Sister M, Llorente Torres A, Fernandez Rodriguez B
P04-09	Performance of the StatStrip POCT analyzer in detecting hypoglycaemic episodes in diabetic patients	Vučić Lovrenčić M, Radišić Biljak V, Božičević S, Car N
P04-10	Implementation of blood gas analysis POCT network in an Italian Health Organization with 3 hospitals	Bianchi V, Camurati C, Casalecchi M, Perticone V, Arfini C
P04-11	Method validation for quantifying cobalt in serum by electrothermal atomic absorption spectrometry	López-Lozano L, Palazón-Bru I, Morales-Bayle C, Palazón-Bru A, González-Estecha M, Arroyo- Fernández M
P04-12	Method validation for quantifying chromium in serum by electrothermal atomic absorption spectrometry	Palazón-Bru I, López-Lozano L, Palazón-Bru A, González- Estecha M, Arroyo-Fernández N
P04-13	Palladium as a universal matrix modifier for ETAAS technique in biological samples	Palazón-Bru I, López-Lozano L, Trasobares-Iglesias E, González- Estecha M, Arroyo-Fernández N
P04-14	Diagnostic odds ratio as a single indicator of PCT performance in different clinical settings	Fernandez Rodriguez E, Barros Garcia C, Garcia Alonso S, Fernandez Garcia E
P04-15	Serum copper, ceruloplasmine and zinc concentrations in a hospital working population	Castillo Perez C, González-Estecha M, Diaz Diaz A, Trasobares E, Morales C, Arroyo M
P05 – D	iabetes mellitus	
P05-01	Comparison of HbA1c results by two immunoturbidimetric methods	Gugo K, Kelava I, Tandara L, Salamunić I
P05-02	Renal tubular markers for predicting early stage diabetic nephropathy in patients with type I diabetes	Shabani M
P05-03	IL-12 concentrations in the aqueous humor and serum of diabetic retinopathy patients	Sapunar A, Gverovic Antunica A, Karaman K, Rodin Kurtovic A Bosnjak N
P05-04	Evaluation of obesity influence on lipid profile in type II diabetes mellitus	Leitão M, Almeida A, Bellém F, Renato A, Apolónio J, Medeiros R
	Non-HDL cholesterol as a predictor of impaired	Bergmann K, Sypniewska G
P05-05		3 , ,,
P05-05 P05-06	glucose metabolism HbA1c – Portuguese EQAS Schemes (2003-2011)	Faria A, Correia H, Brito C, Gomes M

P05-08	Implications of variable preanalytical procedures for the diagnosis of diabetes mellitus in Croatia	Vučić Lovrenčić M, Božičević S, Radišić Biljak V, Mesić R, Poljičanin T, Metelko Ž
P05-09	Use of urinary protein:creatinine ratio in advanced stages of chronic kidney disease in diabetes	Radišić Biljak V, Božičević S, Pavković P, Vučić Lovrenčić M
P05-10	Relationship between PAI and CRP in diabetic patients	Milić M, Marošević L, Paradinović K, Šerić V
P05-11	Tissue transglutaminase antibodies and HLA haplotypes in type 1 diabetic Lithuanian children	Skrodeniene E, Vitkauskiene A, Sadauskaite-Kuehne V, Bilbao J, Padaiga Z, Ludvigsson J
P05-12	Bariatric surgery treatment for type 2 diabetes	Mirošević G, Kruljac I, Nikolić M, Butorac D, Ljubičić N, Vrkljan M
P06 – E	ducation	
P06-01	Do we need complex education courses in special fields of laboratory medicine?	Vavilova T, Sirotkina O, Gaikovaya L
P06-02	Preparing medically oriented education of scientific staff in line with the EC4RC syllabus	Wallinder H, Pettersson T, Ohlsson M, Bökman F, Olsson L, Gälman C
P06-03	Education in laboratory medicine at Lithuanian university of health sciences	Urboniene D, Skrodeniene E, Vitkauskiene A
P06-04	Transnational Project: Developing Good Practice in Preregistration Training (UK & Malta)	Martin J, Wilson G, Adkins A, Cobley A, Hudson J, Khan A
P07 – E	ndocrinology	
P07-01	Indirect estimation for reference intervals of thyroid parameters	Milinkovic N, Ignjatovic S, Majkic-Singh N
P07-02	Does TSH within normal range affect bone turnover in postmenopausal women with osteoporotic fracture	Sypniewska G, Pater A, Nowacki W
P07-03	Serum calcium: much more than "bones"	Cachapuz I, Branco A, Silva S, Magalhaes C, Costa M
P07-04	Tear cytokines in Basedow-Graves ophthalmopathy	Koszegi T, Meiszterics Z, Mezosi E, Ludany A, Kovacs G
P07-05	Determination of total prolactin and prolactin treated with 25% PEG	Županić D, Crnokrak S, Mujagić R, Honović L
P07-06	Reference intervals for reproductive hormones in prepubertal children on the Cobas e 411 analyzer	Zec I, Tišlarić-Medenjak D, Bukovec Megla Ž
P07-07	Seasonal variation of neonatal thyrotropin values	Gligorovic Barhanovic N, Samardzic M, Cutovic N, Antunovic T
P07-08	Relationship between body mass index, mercury and selenium levels in a hospital working population	Morales C, González-Estecha M, Diaz Diaz A, Trasobares E, Castillo Perez C, Arroyo M
P07-09	Is there any justification in the increasing demand for thyroid tests in our laboratory?	Fernandez Leivas A, Garcia Moreira V, Peredo Lopez B, Martinez Gago M, Garcia Alonso S, Fernandez Rodriguez E

P07-10	Diagnostic value of anti-thyroglobulin antibodies in the detection of thyroid pathology in children	Fernandez Leivas A, Garcia Moreira V, Blanco Cristobal C, Martinez Gago M, Garcia Alonso S, Fernandez Rodriguez E
P07-11	Testosterone quantification in human serum using liquid chromatography with tandem mass spectrometry	Depoorter M, Djuidjé C, Delongie K, Wallemacq P, Gruson D, Haufroid V
P07-12	Pheochromocytoma biochemical diagnosis	Ferreira M, Titonel S, Rego M, Reguengo H
P07-13	Comparison of the results of HPLC methods for determination of methanephrine and normethanephrine from urine and blood plasma considering the diagnosis of tumor pheochromocytoma	Brabcová Vránková A, Widimský Jr. J, Zelinka T, Škrha J

P08 – Ev	valuation of analytical systems	
P08-01	Evaluation of the Sysmex UF-1000i urinanalyzer	Pinter E, Toth J, Konderák J
P08-02	Evaluating performance of Cobas c311 and Cobas c501 in the emergency laboratory setting	Lapić I, Lukić I, Kutnjak V, Fressl Juroš G, Rogić D
P08-03	Analytical performance of the OC-Sensor DIANA immunochemical faecal occult blood test	Halloran S, Pearson S, Piggott C, Young M
P08-04	Evaluation and validation of the Cobas 6000 analyzer series modules c501: the urine analytes	Šimičević L, Cigula Kurajica V, Vogrinc Ž, Sertić J
P08-05	Differences between bromcresol green and bromcresol purple measured albumin	Garcia Moreira V, Martinez Gago M, Fernandez Leivas A, Bachiller Sister M, Laborda Gonzalez B, Fernandez Rodriguez E
P08-06	Sodium measurements in urine by the patient at home: primary limitations overcome	Schenk P, Romijn F, Kolb R, Cobbaert C
P08-07	Evaluation and validation of the Cobas 6000 analyzer modules c501: the routine serum analytes	Šimičević L, Cigula Kurajica V, Vogrinc Ž, Sertić J
P08-08	Normalized MEDx chart – useful tool for quick assessment of multiple method performance	Šupak Smolčić V, Bilić-Zulle L
P08-09	Evaluation of haematological analyzer Cell Dyn Ruby	Šega M, Perbil Lazič K, Lokar L
P08-10	Overestimation of albumin (bromcresol green method): influence of acute-phase serum globulins	Garcia Moreira V, Martinez Gago M, Laborda Gonzalez B, Fernandez Leivas A, Llorente Torres A, Fernandez Rodriguez E
P08-11	Comparison of sodium values between emergency and routine biochemical laboratory	Fernandez Leivas A, Garcia Moreira V, Martinez Gago M, Marcos Corona L, Garcia Alonso S, Fernandez Rodriguez E
P08-12	Analytical evaluation of the new random access bench top analyser RX daytona plus	Brown M, McGivern P, O'Neill G, Campbell J, Fitzgerald S

P08-13	The performance of Cobas c311 in stat laboratory	Kutnjak V, Rogić D, Fressl Juroš G
P08-14	Comparison of Emerald and CELL-DYN 1800 for white blood cells and granulocytes in oncology patients	Mittel K, Supak Smolcic V, Dvornik S
P08-15	Body fluids automated cell count: a comparison study between Sysmex XE-5000 and Siemens ADVIA 2120i	Rego M, Titonel S
P09 – F	laematology 1	
P09-01	Verification of CD34+ stem cell analysis according to ISHAGE protocol on Beckton Dickinson FACSCanto	Sokolić I, Šiftar Z, Kardum Paro M, Flegar Meštrić Z
P09-02	Copper deficiencies simulating a myelodysplastic syndrome	Gallego A, Vera J, Peral E, Martín J, Bermudo C, Fábregas M
P09-03	Multiple myeloma: a case report	Cachapuz I, Branco A, Paiva A, Magalhaes C, Costa M
P09-04	Which value can be used as a positivity threshold for Large Unstained Cells on Advia to make slides?	László K, Patonai Z, Kellner V, Fekete M
P09-05	Role of P-selectin glycoprotein ligand-1 (PSGL-1) during G-CSF treatment in a mouse model	Miszti Blasius K, Felszeghy S, Hevessy Z, Kappelmayer J
P09-06	Usefulness of red cell indices in differentiating microcitic anemias	Pavela J, Fijačko M, Dobrošević B, Paradinović K, Šerić V
P09-07	A method of preparing fresh blood samples for Croatian haematology external quality assessment	Nazor A, Flegar-Mestric Z, Hećimović A, Šiftar Z, Hundrić Hašpl Ž
P09-08	Differential count in healthy newborns	Paradinović K, Milić M, Drmić S, Šerić V
P09-09	The effect of the cellularity of the bone marrow aspirate sample for cytogenetic cultures	Tegg E, Raik E
P09-10	Verification of the Body Fluid Application on the Sysmex XE-5000 Hematology Analyzer	Šiftar Z, Kardum-Paro M, Nazor A, Sokolić I, Kardum Skelin I, Flegar Meštrić Z
P09-11	Integration of point-of-care hematology analyzers in the hospital and laboratory information system	Baršić I, Brkljačić V, Šrenger V, Majdenić K, Stojmilović S, Sertić J
P09-12	Blood loss from laboratory tests in adult hospitalized patients	Alatas O, Kocaturk E, Bekmez M, Bayrak C, Harmansa A
P10 - F	laematology 2	
P10-01	State of plasma and platelets hemostasis factors in patients with unstable angina	Markava I, Miadzvedzeva A, Helis L, Kaljadka M, Russkikh I
P10-02	Evaluation of platelet parameters for differential diagnosis of thrombocytosis	Peran N, Reškov Ž, Meniga D, Pamuković-Jaram D, Vesna S
P10-03	Evaluation of in-house normal pool plasma for partial thromboplastin time mixing study on an ACL TOP	Costa P, Reis J, Silva C, Simão L,

P10-04	Comparison of two methods for measuring FVIII	Miloš M, Coen Herak D,
	levels in hemophilia A patients	Zupančić-Šalek S, Zadro R
P10-05	Design and application of lupus anticoagulant	Banys V, Cimoš R
	diagnostic algorithm	
P10-06	Relationship between homocysteine level and	Beletic A, Djordjevic V, Canic
	MTHFR haplotype in patients with thromophilia	I, Mirkovic D, Radojkovic D,
		Majkic-Singh N
P10-07	Validation of Hemoclot® Thrombin Inhibitors assay	Lilja J, Leinonen J, Saarela E,
	for the new oral anticoagulant dabigatran	Lassila R, Joutsi-Korhonen L
P10-08	Indicators of activation of the coagulation system	Obuljen J, Kapović A, Linarić I,
	in children with Henoch-Schönlein purpura	Margetić S, Magdić B, Žižić V
P10-09	Pre-analytical routines in coagulation testing: are	Kristoffersen A, Stavelin A,
	guidelines followed?	Vannes S, Berge Kristensen GB
P10-10	Characterization of blood donors with high	Magnussen K, Hasselbalch H,
	haemoglobin concentration	Ullum H, Weis Bjerrum O
P10-11	Blood donors with thalassemia trait in a blood	Magnussen K
	bank outside the thalassemia belt	
P10-12	Temporary impact of blood donation on physical	Magnussen K, Ziegler A, Grand
	performance in moderately physically active men	J, Helge J
P11 – Ir	nmunology	
P11-01	Comparative analysis of turbidimetry and	Cachapuz I, Moreira S, Neves E,
	nephelometry methods for the measurement of	Lima I, Cerveira C, Alves V
	immunoglobulin	
P11-02	Comparison of rheumatoid factor analysis by	Garcia Moreira V, Fernandez
	nephelometry (BN II) and turbidimetry (ADVIA	Leivas A, Bachiller Sister M,
	2400)	Llorente Torres A, Fernandez
		Rodriguez E
P11-03	Evaluation of C3 and C4 immunoturbidimetric	Knezevic B, Mladina B, Čepić K,
	assays on ABBOTT Architect ci16200 analyzer	Surjan L
P11-04	Comparison of serum total IgE tests performed by	Yoon S, Kim S
-	four different assay systems	
P11-05	Imunonephelometric quantification of monoclonal	Šegulja D, Matišić D, Batinić J,
	protein	Nemet D
P11-07	YKL-40 correlates with pro-inflammatory cytokines	Kazakova M
	in rheumatoid arthritis	
P11-08	Epstein-Barr virus infection resembling	Tesija Kuna A, Zaja-Franulovic
	autoimmune liver disease in 17-year-old girl – case	O, Vukasovic I, Lesar T, Vrkic N
	report	
P11-09	Concentration of IgE antibody in nasal lavage in	Bokulić A, Bukovec Megla Ž,
	allergic rhinitis and non-allergic rhinitis	Kalogjera L, Tomljenović D,
	allergic rhinitis and non-allergic rhinitis	Kalogjera L, Tomljenović D, Vagić D, Zurak K
P11-10		
	Immunologic laboratory diagnostic tests for patients with chronic diarrhea	Vagić D, Zurak K Mladenova T, Shentova R,
	Immunologic laboratory diagnostic tests for	Vagić D, Zurak K Mladenova T, Shentova R,
	Immunologic laboratory diagnostic tests for	Vagić D, Zurak K Mladenova T, Shentova R, Kyurkchiev D, Ivanova-Todorova
P11-10	Immunologic laboratory diagnostic tests for patients with chronic diarrhea	Vagić D, Zurak K Mladenova T, Shentova R, Kyurkchiev D, Ivanova-Todorova E, Spassova Z, Altankova I

P11-12	Eosinophilic cationic protein (ECP) and total IgE	Pancirov D, Ciprić M, Zukan I,
	concentration in children with atopic diseases	Posavec M
P12 - K	Kidney diseases	
P12-01	The performance of compensated serum creatinine in pediatric samples	Aralica M, Matica J
P12-02	The impact of different methods of creatinine measurements on MELD scoring system	Perkov S, Flegar-Meštrić Z, Ožvald I, Kocman B, Čolić-Cvrlje V, Čakalo Lj
P12-03	"Screening" for chronic renal disease in a Portuguese population	Cachapuz I, Branco A, Silva S, Alves V, Costa M
P12-04	Osteoporosis and kidney impairment in postmenopausal women	Pavić M, Milevoj Kopčinović L, Car D, Nikolić T
P12-05	Iron content of serum ferritin: a biomarker of iron storage	Mujagic R, Obuljen J, Crnokrak S
P12-06	Nitric oxide and homocysteine in patients with chronic kidney disease	Mikulić I, Petrik J, Čepelak I, Tomić M, Baković V, Mikulić V
P12-07	Estimated glomerular filtration rate, hypertension and blood mercury in a hospital working population	Diaz Diaz A, Morales C, Trasobares E, Castillo Perez C, Fuentes M, González-Estecha M
P12-08	Cadmium, estimated glomerular filtration rate and hypertension in a hospital working population	Diaz Diaz A, González-Estecha M, Castillo Perez C, Morales C, Fuentes M, Arroyo M
P12-09	uNGAL in deceased donors as a marker of early kidney transplant injury	Kalachyk A, Oganova E, Naderi U, Sadovski D, Dolgolikova A
P12-10	Low-grade inflammation and iron metabolism in chronic kidney disease (CKD) patients	Tandara L, Salamunić I, Gugo K, Bilopavlovic N, Pauković-Sekulić B, Tandara M
P12-11	Cystatin C in early diagnosis of contrast-induced acute kidney injury	Vavilova T, Klyusova S, Gaykovaya L
P12-12	Protein:Creatinine ratio in spot urines to predict proteinuria in chronic kidney disease	Shrestha R, Gyawali P, Neopane P, Jha B
P12-13	Sensitivity and specificity of NGAL in acute pyelonephritis	Mandić S, Arambašić J, Horvat V, Mandić D, Šerić V
P12-14	Assessment of the new CKD-EPI formula to estimate CKD in hospitalized patients	Fernandez Rodriguez E, Garcia Alonso S, Fernandez Garcia E
P13 - L	ung, liver and gastrointestinal diseases	
P13-01	Serum copper concentrations and cardiomyopathy in cystic fibrosis patients	Castillo Perez C, González- Estecha M, Morales C, Ruiz L, Díaz Díaz A, Segovia J
P13-02	Lead and cadmium in cystic fibrosis	Castillo Perez C, González- Estecha M, Díaz Díaz A, Ruiz L, Maíz L, Segovia J
P13-03	Interaction of blood mercury with essential trace elements in a cystic fibrosis population	Morales C, González-Estecha M, Castillo Perez C, Ruiz L, Prados C, Segovia J

P13-04	Selenium and mercury and the left ventricular	González-Estecha M, Ruiz L,
	ejection fraction in adult cystic fibrosis patients	Castillo Perez C, Morales C, Díaz Díaz A, Segovia J
P13-05	Monitoring faecal occult blood test positivity in the	Halloran S, Burtonwood C,
	NHS Bowel Cancer Screening Programme	Butler P, Young M
P13-06	The NHS Bowel Cancer Screening Programme,	Halloran S, Seaman H, Young M
	Southern Hub – screening activity and outcomes	
P13-07	Comparative study of the risk of developing NAFLD	Almeida A, Pires C, Paulo R,
	in individuals without liver disease	Leitao C, Bellem F, Abreu R
P13-08	Citrulline – marker of enterocytes mass and	Sedlackova T, Rajdl D, Ladislav T,
D12 00	function in patients after stem cells transplantation	
P13-09	Prevalence of AMHA and ANA in patients with	Padjen I, Kozmar A, Mayer M, Sentić M, Malenica B
P13-10	suspicious primary biliary cirrhosis Comparison of fecal calprotectin and CRP in	Linarić I, Obuljen J, Margetić S,
F 13-10	pediatric inflammatory bowel disease	Mišak Z, Hojsak I, Žižić V
P13-11	Lipid profile in patients with chronic obstructive	Milevoj Kopčinović L, Pancirov
	pulmonary disease	D, Simić L, Čepelak I, Žanić
	. ,	Grubišić T, Rumora L
P13-12	MMP-9 and TIMP-1 concentrations in plasma	Somborac Bačura A, Rumora
	of patients with chronic obstructive pulmonary	L, Šribar D, Popović-Grle S,
	disease	Čepelak I, Žanić Grubišić T
P13-13	The relationship between BAL IL-8 and DLCO in	Fijačko M, Fijačko V, Dobrošević
	patients with COPD	B, Pavela J, Sikora I, Šerić V
P14 - M	licrobiology - Infection	
P14 - M	Screening for the urinary tract infections using	Konderak J, Elmardi A, Farkas B,
P14-01	Screening for the urinary tract infections using Sysmex UF 1000i flow cytometer	Pinter E
	Screening for the urinary tract infections using Sysmex UF 1000i flow cytometer Comparison between a syphilis screen of two	
P14-01 P14-02	Screening for the urinary tract infections using Sysmex UF 1000i flow cytometer Comparison between a syphilis screen of two immunoassays for the diagnosis of syphilis	Pinter E Saue E, Viia V, Mägi M
P14-01	Screening for the urinary tract infections using Sysmex UF 1000i flow cytometer Comparison between a syphilis screen of two immunoassays for the diagnosis of syphilis Procalcitonin as early diagnostic marker for	Pinter E Saue E, Viia V, Mägi M Alonso T, Cuadrado-Cenzual M,
P14-01 P14-02	Screening for the urinary tract infections using Sysmex UF 1000i flow cytometer Comparison between a syphilis screen of two immunoassays for the diagnosis of syphilis	Pinter E Saue E, Viia V, Mägi M Alonso T, Cuadrado-Cenzual M, De Gracia Y, Ortega De Heredia
P14-01 P14-02 P14-03	Screening for the urinary tract infections using Sysmex UF 1000i flow cytometer Comparison between a syphilis screen of two immunoassays for the diagnosis of syphilis Procalcitonin as early diagnostic marker for infection in febril neutropenia cancer patients	Pinter E Saue E, Viia V, Mägi M Alonso T, Cuadrado-Cenzual M, De Gracia Y, Ortega De Heredia D, Perez-Segura P
P14-01 P14-02	Screening for the urinary tract infections using Sysmex UF 1000i flow cytometer Comparison between a syphilis screen of two immunoassays for the diagnosis of syphilis Procalcitonin as early diagnostic marker for infection in febril neutropenia cancer patients The role of procalcitonin in sepsis patients with	Pinter E Saue E, Viia V, Mägi M Alonso T, Cuadrado-Cenzual M, De Gracia Y, Ortega De Heredia D, Perez-Segura P Cachapuz I, Sousa M, Granja C,
P14-01 P14-02 P14-03 P14-04	Screening for the urinary tract infections using Sysmex UF 1000i flow cytometer Comparison between a syphilis screen of two immunoassays for the diagnosis of syphilis Procalcitonin as early diagnostic marker for infection in febril neutropenia cancer patients The role of procalcitonin in sepsis patients with pneumonia	Pinter E Saue E, Viia V, Mägi M Alonso T, Cuadrado-Cenzual M, De Gracia Y, Ortega De Heredia D, Perez-Segura P Cachapuz I, Sousa M, Granja C, Alves V

P14-09	Trends in antibiotics prescribed for bacterial pneumonia with higher CRP in preschool children	Bajraktarevic A, Kaljic Junuzovic A, Miokovic M, Penava S, Mulabegovic J, Delic M
P15 - N	Nolecular diagnosis 1	
P15-01	The association of postprandial triglycerides with hsCRP, TAS, ICAM-1 and APOA5 and HL gene variants	Kackov S, Simundic A, Nikolac N, Celap I, Dukic L, Bilusic M
P15-02	Association of three polymorphisms of scavenger receptor class BI gene in with coronary stenosis	Bouslama A
P15-03	Six lipoprotein lipase gene polymorphisms, lipids and coronary stenosis in a Tunisian population	Rebhi L, Kchok K, Omezzine A, Rejeb J, Boughzala E, Bouslama A
P15-04	Toll-like receptors tlr-2 and tlr-4 gene polymorphisms in patients with cerebral atherosclerosis	Galovic R, Flegar-Mestric Z, Matokanovic M, Brajsa K, Vidjak V, Barisic K
P15-05	Four resistin polymorphisms, metabolic syndrome parameters and obesity risk in Tunisian volunteers	Boumaiza I, Omezzine A, Rejeb J, Rebhi L, Ben Rejeb N, Bouslama A
P15-06	Simultaneous detection of mutations within genes associated with familial hypercholesterolemia	Latten M, Murray H, Graham C, Martin R, Crockard M, Fitzgerald S
P15-07	Apolipoprotein A5 genetic polymorphisms and fasting serum lipidogram in elderly subjects with MetS	Feher Turkovic L, Pasalic D, Pavlovic M
P15-08	Adiponectin gene variants, and gene-environment interactions as predictors of early central obesity	Karmelić I, Lovrić J, Sertić J, Božina T, Božina N, Jelaković B
P15-09	Gender-specific effects of PPARG, APOE, ACE, LPL, IL-6 and AT1R gene variants on metabolic syndrome	Božina T, Sertić J, Lovrić J, Jelaković B, Merkler M, Reiner Ž
P15-10	Contribution of 5-HTTLPR and BDNF gene variants to obesity risk	Božina T, Sertić J, Lovrić J, Jelaković B, Jovanović N, Božina N
P15-11	ABCG2 gene variant and fluvastatin adverse drug reactions in renal transplant recipients	Mirošević Skvrce N, Božina N, Pejnović L, Barišić I, Zibar L, Macolić-Šarinić V
P15-12	Association of soluble and -2518 A>G <i>CCL2</i> polymorphism with inflammation markers and IR	Guzman Ornelas M, Valdez Alvarado E, Aguilar Aldrete M, Sierra Amor R, Castro Albarran J, Navarro Hernandez R
P15-13	Association of PAI-1 5G allele with inflammation markers and body fat in Mexican with obesity	Diaz-Rubio G, Navarro Hernandez R, Chavarria-Avila E, Aguilar-Uscanga B, Reyes- Blanco M, Ruiz-Quezada S
P16 - N	Iolecular diagnosis 2	
P16-01	Genotyping of 13 α -thalassaemia point mutations using primer extension reaction and dipstick assay	Petropoulou M

P16-02	Descriptive study of genotype frequencies of Ala9Val polymorphism of SOD-Mn in chagasic patients	D'arrigo M, Gerrard G, Lioi S, Zumoffen C, Beloscar J
P16-03	Endothelial NO-synthase gene polymorphism in pathogenesis of lacunar stroke	Topuzova MP, Klocheva EG, Zaytseva NO, Goldobin VV, Vavilova TV, Sirotkina OV
P16-04	Clinical manifestation of hereditary angioedema is less severe in patients with missense mutations	Bors A, Varga L, Farkas H, Tordai A, Fust G, Szilagyi A
P16-05	Serotonin transporter polymorphism (5-HTTLPR) in Croatian population	Culej J, Štefanović M, Karlović D
P16-06	Q192R and L55M pon1 gene polymorphisms associated with peripheral arterial disease	Kardum Paro M, Perkov S, Flegar- Meštrić Z, Vidjak V, Novačić K, Barišić K
P16-07	Platelet receptor for von Willebrand factor: gene polymorphism and cerebrovascular disease	Laskovets A, Zaytseva N, Goldobin V, Klocheva E, Vavilova T, Sirotkina O
P16-08	Li-Fraumeni Syndrome: description of a new pathogenic TP53 mutation	Illana F, Llovet P, de la Hoya M, Olivera H, Perez-Segura P, Caldes T
P16-09	ATP7B gene mutations in Wilson disease patients from Croatia	Ljubić H, Božina T, Merkler A, Relja M, Kalauz M, Sertić J
P16-10	Molecular genetic analysis of primary immunodeficiency diseases in Croatian patients	Merkler A, Richter D, Kelečić J, Rako I, Marodi L, Sertić J
P16-11	HLA-DQ genotyping of celiac disease in Mersin Province of Turkey	Polat G, Yesiltepe Y, Altıntas E, Ates F
P16-12	Sequencing analysis of <i>CFTR</i> gene in Croatian patients with cystic fibrosis	Zekušić M, Ljubić H, Juričić L, Tješić-Drinković D, Rako I, Sertić J
P17 - O	ncology - Tumor marker 1	
P17-01	New strategies to improve the quality and efficiency of health assistance to chronic cancer patients	Torrubia B, Guessous A, De Gracia Y, Cuadrado-Cenzual M
P17-02	Usefulness of inflammatory markers in assessing the severity of colorectal cancer	Đerek L, Servis D, Unic A, Juricek J, Romic Z
P17-03	The phosphorescence as a predictive basis of early diagnosis of oncopathology	Gramatiuk S
P17-04	Study of cytokines, as potential biomarkers in the diagnosis of oral squamous cell cancer	Hamad A
P17-05	Germline polymorphisms in LRIG1 gene predict clinical outcome in metastatic colorectal cancer	Paez D, Pare L, Sebio A, Del Rio E, Barnadas A, Baiget M
P17-06	Proantocyanidins in cytoprotection of antitumor drugs-treated cells	Katanic J, Stankov K, Srdjenovic B, Pavlovic N, Bogdanovic V, Bogdanovic G
P17-07	YKL-40, IL-1 β and TNF- α in malignant glioma	Kazakova M
P17-08	Tumour markers in fluid analysis in the differential diagnosis of cystic lesions of the pancreas	Albuquerque M, Rego de Sousa N

P17-09	Multiplex biochip arrays allow simultaneous assessment of serum markers for colon cancer screening	Bunger S, Fitzgerald S, Toner V, Buning J, von Eggeling F, Habermann J
P17-10	Identification of novel cancer biomarkers using the	Antal-Szalmas P, Lazar J,
	Randox-QuantiPlasm69 monoclonal antibody chip	McGregor S, Muller M, Kurucz I, Kappelmayer J
P18 - O	ncology - Tumor marker 2	
P18-01	Evaluation of tumor marker HE4 assay on the Elecsys 2010 analyzer	Ćorić J
P18-02	CYFRA 21-1 new tumor marker in Abbott iArchitect family	Županić D, Crnokrak S, Mujagić R, Honović L
P18-03	Analytical performance of tumor markers on UniCel Dxl 600 using Sigma metrics	Unic A, Derek L, Marijancevic D, Serdar T, Romic Z
P18-04	Prognostic value of Cyfra 21-1, CEA and NSE in patients with NSCLC	Musliu A
P18-05	Computational screening for non-small cell lung carcinoma biomarker candidates	Dundovic S, Debeljak Z, Seric V
P18-06	Prognostic and predictive significance of ERβ1 in primary breast cancer	Jelisavac Ćosić S, Jakić-Razumović J, Sirotković-Skerlev M
P18-07	Comparative study of two chemiluminescent methods for determining free PSA	Fernandez Leivas A, Garcia Moreira V, Llorente Torres A, Beridze N, Garcia Alonso S, Fernandez Rodriguez E
P18-08	Soluble urokinase plasminogen activator receptor (suPAR) in breast cancer	Tarapacz J, Rychlik U, Wójcik E, Stasik Z, Kulpa J
P18-09	BRAF: potential prognostic marker in colorectal cancer	Rako I, Jakić-Razumović J, Sabol I, Sertić J, Pleština S
P18-10	Assessment of serum CA 15-3 and CEA concentrations in patients with breast cancer	Tuteska J, Stojkovski V, Arapceska M, Lozanovski Z, Risteska K
P19 - Pr	egnancy	
P19-01	Results of first trimester screening for Down's, Edward's and Patau's syn using SsdwLab5 software	Spasić Obradović G, Ille K, Mitrović J, Milatović Jezdić V
P19-02	The role of antenatal screening and amniocentesis on the Down's syndrome diagnosis – our experiences	Hoxha-Muhaxhiri M, Muhaxhiri F
P19-03	Standard and new laboratory markers and their usefulness in prediction of preeclampsia	Štefanović M, Delić R, Krivec Š
P19-04	Comparison of the "SsdwLab 5.0.9" and "Fetal Medicine Foundation" Down syndrom screening softwares	Radeljak A, Podobnik Brlecic P, Ožvald I, Gebauer Vukovic B, Podobnik M, Stojanovic N
P19-05	What do the triple test results mean?	Popovic D, Vujovic S, Stanisic N
P19-06	Analysis of biochemical parametars in the perinatal screening	Vujovic S, Popovic D, Ajanovic E, Jovanovic M
P19-07	SNP's in LEP gene and LEPR gene are associated with recurrent spontaneous abortions (RSA)	Wagner J, Muller A, Škrlec I, Heffer M, Maver A, Peterlin B

P19-08		
	The effect of pomegranate seed oil on histological features of testis and sperm quality in male rats	Nikseresht M, Mahmoudi R, Sharifi A, Rahimipour Sisakht F, Sane F, Jafari M
P20 - Re	enal replacement	
P20-01	Monitoring serial creatinine results in kidney transplant patients using the StatSensor POCT device	Cobbaert C, Romijn F, van Lint C, Schenk P, van der Boog P
P20-02	Falsely decreased ionized calcium in a dialysis patient	Lukić I, Lapić I, Fressl Juroš G, Brunetta Gavranić B, Rogić D
P20-03	High-sensitive cardiac troponin T predicts survival in patients on chronic hemodialysis	Rajdl D, Racek J, Eiselt J, Trefil L, Malánová L
P20-04	Interpretation of cardiac markers in end stage renal disease patients in hemodialysis (HD)	Aakre K, Røraas T, Petersen P, Svarstad E, Sandberg S
P20-05	The role of NGAL as predictor of delayed graft function after kidney transplantation	Glisic B, Lalic N, Naumovic R, Durutovic O, Majkic-Singh N
P20-06	Nutritional status assessment in patients undergoing hemodialysis	Crnokrak S, Mujagić R, Honović L
P20-07	Visfatin is not associated with inflammatory markers in patients on hemodialysis	Ćelap I, Šimundić AM, Nikolac N, Miler M, Altabas K, Šefer S
P20-08	Effect of hemodialysis on the expression of TLR-4 on monocytes	Dobrošević B, Bilandžija M, Barbić J, Šerić V
P20-09	Markers of the obesity and inflammation in patients with metabolic syndrome and on dialysis	Miler M, Segulja D, Nikolac N, Celap I, Kackov S, Simundic AM
P21 - To	xicology and TDM	
P21-01	Analytical validation of valproic acid on the Abbott Architect c8000 clinical chemistry system	Čepić K, Dujmov I, Mladina B, Šupe Domić D, Stanišić L
P21-02	The possible anti-cholinesterase properties of biologically synthesized platinum nanoparticles	Arowolo A, Whiteley C
P21-03	Recreational drugs in clinical toxicology: new challenges in the everyday routine	Lakatos A, Lajtai A, Porpaczy Z, Mayer M, Kovacs G
P21-04	Cannabimimetics – A new challenge in routine clinical toxicology	Grobosch T, Binscheck T
	Extreme case of designer drug abuse	Laitai A Lakatos A Donkő A
P21-05		Lajtai A, Lakatos A, Benkő A, Mayer M, Porpáczy Z, Kovács LG
P21-05	Identification of acidic compounds in acute intoxications by on-line SPE-HPLC-DAD	Mayer M, Porpáczy Z, Kovács LG Mut L, Grobosch T, Binscheck T, Frenzel W
	Identification of acidic compounds in acute	Mayer M, Porpáczy Z, Kovács LG Mut L, Grobosch T, Binscheck T, Frenzel W
P21-06	Identification of acidic compounds in acute intoxications by on-line SPE-HPLC-DAD Automated online solid phase extraction UPLC/MS/MS for the analysis of mycophenolic acid Automated online solid phase extraction UPLC/MS/MS for simultaneous analysis of immunosuppressants	Mayer M, Porpáczy Z, Kovács LG Mut L, Grobosch T, Binscheck T, Frenzel W Eastwood M, Chusney G,
P21-06	Identification of acidic compounds in acute intoxications by on-line SPE-HPLC-DAD Automated online solid phase extraction UPLC/MS/MS for the analysis of mycophenolic acid Automated online solid phase extraction UPLC/MS/MS for simultaneous analysis of	Mayer M, Porpáczy Z, Kovács LG Mut L, Grobosch T, Binscheck T, Frenzel W Eastwood M, Chusney G, Calton L Eastwood M, Balloch S, Cooper

P21-11	Blood mercury concentrations in 3 cities in Spain	Trasobares E, González -Estecha M, Martínez García M, Herbello Hermelo P, Bermejo Barrera P, Guillén Pérez J
P21-12	Influence of immunosuppressive regimen change on renal function in liver transplant recipients	Ožvald I, Mrzljak A, Radisic Biljak V, Perkov S, Flegar Mestric Z
P21-13	Multi-drug intoxication fatality involving atorvastatin: a case report	Cibicek N, Caran T, Pribyl P, Dobias M, Ondra P, Vorisek V
P21-14	Pharmacokinetics of mycophenolic acid in renal allograft recipients: role of ABCC2 polymorphisms	Lalić Z, Božina N, Nađ Škegro S, Trkulja V, Lovrić M, Granić P
P21-15	HPLC of carbohydrate-deficient transferin and more sialylated transferrin glycoforms in children	Bianchi V, Raspagni A, Arfini C, Vidali M
P22 - V	itamin D - PTH	
P22-01	Comparison of total 25-OH vitamin D automated immunoassays versus LC-MS/MS	Bausela C, Gaviña B, Ortega I, Torrejón M, Arroyo M
P22-02	Stability of PTH in blood specimens after delayed processing	Fernandez Leivas A, Garcia Moreira V, Laborda Gonzalez B, Martinez Gago M, Garcia Alonso S, Fernandez Rodriguez E
P22-03	Evaluation of automated method for measurement of serum 25-hydroxyvitamin D	· •
P22-04	Vitamin D status in heart failure patients is dependent on the assay method used	Silva N, Martins S, Tuna D, Lourenço P, Bettencourt P, Guimaraes J
P22-05	Comparison of vitamin D3 and total vitamin D values	Županić D, Crnokrak S, Juričić G, Jedrejčić K, Honović L
P22-06	Comparison of two immunoassays for 25-OH vitamin D	Mägi M

DRG:HYBRID•XL

DRG introduces the totally newly designed **DRG:HYBR:D-XL** Analyzer.

This innovative and unique technology allows, for the first time, the simultaneous measurement of immunoassays and clinical chemistry parameters including tubidimetric tests in one sample.

- Up to 20 samples/run
- Random access possible
- STAT possible
- Sample dilution up to 1:1000 inside the analyzer
- Reagents 12 month stable
- "Liquid level detection"
- Color Monitor, Touchscreen (8.5 inch)

CATHEDRAL

Dubrovnik's Cathedral stands in the center of Poljana Marin Drzic, close to Rector's Palace. The first Dubrovnik Cathedral was built from the 12th to the 14th century in Romanesque style. It was destroyed in the Great Earthquake in 1667 and the present Cathedral was built on its place. The reconstruction of the Cathedral was done by Buffalini (1671), Andreotti, Napoli, and finally finished by Katieia in 1713.

This Romanesque Baroque style Cathedral is a three-hall building which contains a rich treasury and a line of paintings by top masters. The exterior is decorated with a balustrade enclosing the roofs of the aisles and surmounted by statues of saints. The interior is light and spacious and accommodates paintings of old masters such as Titian's, Padovanino's works, etc. The Cathedral's Treasury is situated in the beautiful baroque chapel designed by Gropelli and painted by Mattei Matejevia. The Treasury consists of 138 reliquaries, most of which are traditionally carried in procession round the city on the feast of St. Vlaho. On the altar stand the three major reliquaries of St. Vlaho.

Congress official language

The official language of the Congress is English.

Congress venue

Hotel Rixos Liechtensteinov put 3 20 000 Dubrovnik Croatia Tel. +385 20 200 126 Fax. +385 20 200 020

Registration fee

www.rixos.com

Date of payment determines amount of registration fee.

	Before 10 September, 2012	After 10 September, 2012	On-site
Registration fee	400 EUR	500 EUR	600 EUR

Electricity

Croatian house current in wall sockets is 220 volts, 50 Hz.

Elecsys[®] **cardiac Troponin T-high sensitive** *Superior degree of test sensitivity and accuracy*

Compared to conventional tests, it shows higher sensitivity enabling:

- Earlier diagnosis
- Faster rule-out of AMI
- Improved prediction of adverse outcomes
